

School poster competition - Geebung State School

Composting competition

In term 3, 2023, Geebung State School held a competition for the whole school, from Prep to Year 6, to design a composting poster. Prep students completed a colouring in competition style poster.

The criteria for the posters were:

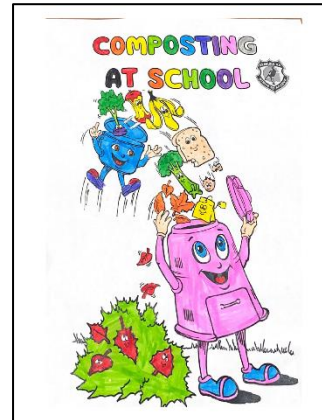

- A catchy message about composting, along with the benefits;
- Colourful pictures linked to composting, gardens, fruit and veggies; and
- Overall clear and appealing poster style.

This is a great way to link the work happening with the school garden and the curriculum for sustainability, design and science. It's also fun for the students, whose work was showcased in the school assembly too.

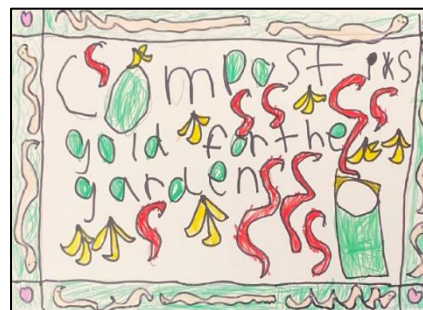

The school received a great response. Here are the finalists:

Prep (winner)

Year 1

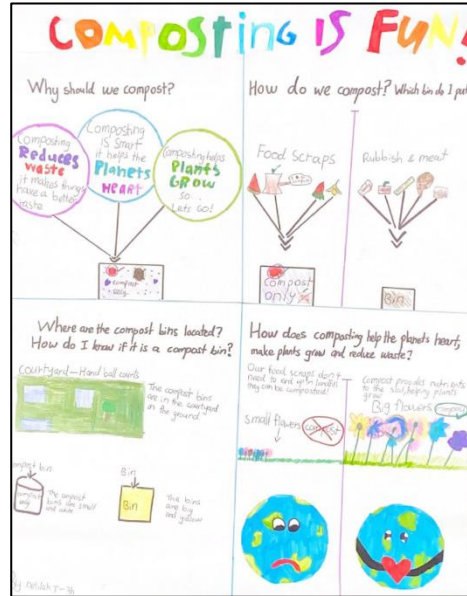

School poster competition - Geebung State School

Year 2

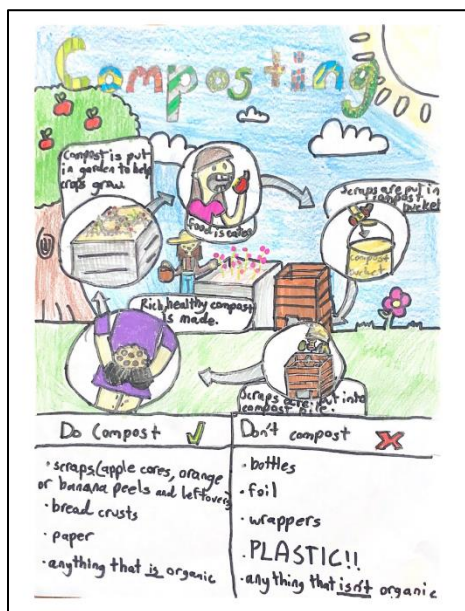

Year 3

School poster competition - Geebung State School

Year 4 to 6
