Cancer Screening				
BreastScreen Queensland	BreastScreen Queensland invites women aged 50-74 years who haven't noticed any changes to their breasts to have a free breast screen every two years, unless otherwise advised. It is recommended that women aged 40-49 years, and over 75 years, consult their GP about whether breast screening is right for them.	Delivered face to face in the South West Queensland region via visiting mobile van.	Available statewide. To find a location, visit: https://www.breastscreen.qld.gov.au/find-a-location	Between the ages of 50-74 years, women are invited to participate in breast screening every two years. Community members can call 13 20 50 or visit the BreastScreen Queensland website to book a free appointment.
Cervical Screening	The Cervical Screening Test detects human papillomavirus (HPV) and looks for early changes in the cells of the cervix if HPV is detected. This test is for people aged 25-74 years who have a cervix and have ever been sexually active, every five years unless otherwise advised.	Choice to collect own sample, or healthcare provider can collect sample.	Available statewide	Community members contact their usual general practice or Aboriginal and Torres Strait Islander Community Controlled Health Organisation (A&TSICCHO)
Bowel Cancer Screening	Men and women aged 45-74 can participate in bowel cancer screening every 2 years by completing a simple, free home test kit. If symptoms are present or there is a family history of bowel cancer, individual screening needs to be discussed with GP.	Home bowel screening kit sent via mail from the National Bowel Cancer Screening Program.	Available statewide	Between the ages of 45-49, individuals can commence the bowel screening program by requesting an at home bowel screening kit. Between the ages of 50-74 years, individuals are invited to participate in bowel cancer screening every two years. To request a bowel screening kit, or order a replacement, community members can visit https://www.ncsr.gov.au/information-for-participants/order-a-replacement-bowel-test-kit
Other pathways:				

Program	Description	Delivery	Delivery locations	Access Pathway
Primary Care	A recommendation to visit an individual's preferred primary health care provider for further health assessment or management of chronic and complex conditions.	Usual general practice or A&TSCCHO.	Available locally	Community members contact their usual general practice or A&TSCCHO

*Note for frontline health professionals:

In addition to the Mental Wellbeing Programs listed above, following are two evidence-based mental health and wellbeing apps for clinician supported delivery.

Stay Strong

The AlMhi Stay Strong App is a motivational care planning tool that assists health professionals to promote the wellbeing of First Nations Australians by considering their social supports, strengths, worries and the goals or changes they would like to make. It is an evidence-based, low-intensity mental health and wellbeing app that is culturally relevant for First Nations Australians. Visit: https://www.menzies.edu.au/page/Research/Projects/Mental_Health_and_wellbeing/Development_of_the_Stay_Strong_iPad_App/

Weathering Well

Adapted from Stay Strong, the Weathering Well app is designed for Australian farming communities, in particular farmers, growers and graziers experiencing adversity from drought and other climatic events. The app uses strength-based motivational interviewing techniques to deliver a structured low intensity mental health, wellbeing, and alcohol and drug intervention. Visit: https://www.menzies.edu.au/page/Research/Projects/Mental_Health_and_wellbeing/The_Weathering_Well_app/

Wellness my Way is an initiative of the Queensland Government, delivered in partnership by Health and Wellbeing Queensland, Queensland Health's Health Contact Centre, South West Hospital and Health Service and The Health and Wellbeing Centre for Research Innovation at The University of Queensland.
